
Conservación del momento lineal: p_f vs p_i
$y = m\,x + n$
$m = 0.9867 \pm 0.0019$
$n = 0.0001 \pm 0.0002$
$R^2 = 0.999989$
$N = 5$
Si se conserva: $p_f = p_i \;\Rightarrow\; m = 1,\; n = 0$
$m \approx 1$ (conservación verificada)
$n \approx 0$ (sin sesgo sistemático)
