
Precesión vs inverso de la velocidad angular del disco
$y = m\,x + n$
$m = 54.8366 \pm 0.2804$
$n = 0.0046 \pm 0.0037$
$R^2 = 0.999869$
$N = 7$
$\Omega_p = \frac{\tau}{I\,\omega} = \frac{\tau}{I} \cdot \frac{1}{\omega}$
$m = \tau / I$
$n \approx 0$
