
Precesión vs par aplicado ($\omega = 1000$ rpm)
$y = m\,x + n$
$m = 8.0039 \pm 0.0617$
$n = -0.0020 \pm 0.0069$
$R^2 = 0.999822$
$N = 5$
$\Omega_p = \dfrac{1}{I\,\omega}\,\tau$
$m = 1/(I\,\omega)$
$n \approx 0$
