
Máquina de Atwood: aceleración vs Δm
$y = m\,x + n$
$m = 13.3893 \pm 0.0497$
$n = -0.0007 \pm 0.0003$
$R^2 = 0.999931$
$N = 7$
$a = \dfrac{g}{M + I/R^2}\,\Delta m - \dfrac{\Gamma_r}{R(M + I/R^2)}$
$m = g/(M + I/R^2)$
$n = -\Gamma_r/[R(M + I/R^2)]$
