
Péndulo circular: T^2 vs h
$y = m\,x + n$
$m = 4.0191 \pm 0.0019$
$n = 0.0020 \pm 0.0009$
$R^2 = 0.999999$
$N = 8$
$T^2 = \frac{4\pi^2}{g}\,h + n$
$m = 4\pi^2/g \;\Rightarrow\; g = 4\pi^2/m$
$n \approx 0$ (sin error sistemático)
